In connection with the water works carried out by the Water Supply Department for the Municipality, an item of establishment charges amounting to 17½ % is being included in all the estimates received from the Water Supply Department for laying sub-mains taps etc, in the City. A reference having been made to the Water Supply Department as to why, in addition to paying the maintenance charges which includes cost of establishment a further item of 17½ % is being included to every estimate, it is intimated by the Chief Engineer in his Office reference No 428 dated 26th November 1928, that there is no reason for 17½ % being levied towards establishment charges, since the Municipality is paying for establishment and that the matter is before Government. I may show to you in this connection, that if orders are passed early in this matter, some funds will be found for a very important item of work relating to the improvement of scanty water supply to the City. Please submit this to the Councillor, if there is no objection.

Yours sincerely,

Chacko
